🌐 LinkedIn 🐙 Github 🔗 Leetcode

SUMMARY

Software Engineer specializing in **backend development** and **machine learning**. Experienced in building **scalable systems** using Java, MySQL, PHP, and Python, with strong skills in **data preprocessing, feature engineering, and applied machine learning**. Passionate about solving complex, data-driven problems and delivering impactful solutions. Committed to continuous learning and exploring cutting-edge technologies.

EXPERIENCE

Information Network Security Administration (INSA), AI & Machine Learning Intern,
Working on Natural Language Processing (NLP) projects using **PyTorch** and deep learning.

crypto-time-series-forecasting

Developed and implemented LSTM and GRU time series forecasting models to predict cryptocurrency price trends, integrating them into a live trading environment and achieving up to 92% prediction accuracy, improving real-time trading decision reliability by 30%.

Conducted regular performance evaluations of forecasting models and adjusted parameters to optimize results.

judicial-decision-predictor

- Developed an NLP-based machine learning model to predict court case outcomes (affirmed vs. reversed) from legal text.
- Preprocessed and analyzed judicial case documents using text cleaning, tokenization, and feature extraction (e.g., TF-IDF).
- Identified patterns in legal reasoning to improve prediction performance.
- Implemented an end-to-end pipeline from data preprocessing to model evaluation using Python.
- Utilized libraries such as Scikit-learn, Pandas, and NumPy for model development.

Mental Health Tracker, Project

- Designed and developed a mood tracking system using Java that monitors users' progress, provides insights, and offers tailored resources to enhance their well-being
- Gained hands-on experience in debugging, optimizing, and deploying backend systems effectively

EDUCATION

Haramaya University, Bachelor of Technology

03/2023 – Present

- Software Engineering

COURSE

Kinful Social-Emotional Learning Program, *Kinful*

- Completed courses to enhance social-emotional intelligence, focusing on key areas: Self-Management skill, Self-Awareness skill, Social Awareness, Relationship Skill, Responsible Decision-Making

VOLUNTEER EXPERIENCE

Volunteer

Present

Actively contributed to supporting the organization through visits and assistance. Mentored model school students, enhancing their English proficiency and fostering social-emotional learning skills. And assisted in various initiatives aimed at uplifting and supporting members of the community.
